SECOND WEEKEND

JANUARY 14, FEATURED ART ON DISPLAY

KAISER GALLERY – 2418 Professor Ave.

Future Resonance

This year's Future Resonance exhibition seeks to explore technology as an aspect of human expression - how technology can push our thoughts into new horizons while creating avenues for artistic visionaries to express themselves. Future Resonance presents yet another amazing batch of artists and creators who explore the field of sound and light as a universal media. The exhibition is an invitation to explore the ways in which technology and artistic practices converge. See the synchronicity of these artists as they change the way we see the world. Presenting the works of Mike Bruckman, Jeremy Davis, Jeremy Newman, Thea Reid, Ethan Samaha, Dustin Steuck and Anna Thorne.
