JUNE 10TH, FEATURED ART ON DISPLAY

KAISER GALLERY – 2418 Professor Ave.

Handful of Dream-Dust—Opening Reception
A local treasure within Cleveland's art scene, artist Jonah Jacobs explores themes of beauty, complexity and eco-consciousness to create works that are simultaneously thought-provoking and visually stunning. Jacobs' large-scale pieces combine thousands of individual geometric shapes to create mesmerizing forms that reference fractal patterns, bio colonies and other complex systems. Jacobs merges creativity with science in an innovative way, to create artworks that explore ideas about order, chaos, growth, decay and life cycles—the pervasive yet elusive forces that shape our world. Jacobs also treats every exhibition as an opportunity to teach and inspire others how to create artwork that is more environmentally friendly by utilizing unexpected materials for his large-scale art installations, such as cardboard, egg cartons, yarn, quinoa, oatmeal, dryer sheets, and other textiles to name a few. Plus, curated cocktails for the opening reception.
